
to show, marked, the changes to existing law for the affected Title 21 device sections

IN THE HOUSE OF REPRESENTATIVES

June 5, 2026

Mr. Kevin Kawchak prepared the following comparative print with the assistance of artificial intelligence; the measure it accompanies would be referred to the Committee on Energy and Commerce.

A COMPARATIVE PRINT

This legislative draft is submitted for review and consideration by the United States Congress,

Prepared by Kevin Kawchak , CEO ChemicalQDevice.
kevink@chemicalqdevice.com 10.5281/zenodo.xxxxxxxx

This comparative print accompanies H. R. 9510, the Verification Before Generation in Physical AI Oncology Trials Act of 2026. It was prepared with the assistance of an autonomous AI coding agent under human direction. It is an independent research draft, is not an enacted law, and is not legal advice. DOI 10.5281/zenodo.xxxxxxxx.

Keywords

SEC. 1. PURPOSE AND SCOPE.

This section introduces the comparative print and states the scope of this comparative print. Replace this short paragraph with the opening context; one short paragraph per section keeps the template minimal and easy to extend.

SEC. 2. BACKGROUND AND FIGURE.

This section gives the background for the comparative print. The single image placeholder below is based on the figure code of VVUQ-02 and renders a framed box until a real PNG is dropped into the Images folder.

Figure 1: Figure 1. Placeholder schematic for this comparative print.

SEC. 3. RECORD AT A GLANCE.

This section records the comparative print at a glance. The one table below is modeled on Table 1 of the VVUQ-05 final bill; keep cells short and ragged right so the table matches the body measure.

Work	What it is	Releases	Headline result	End-goal DOI
VVUQ-01	method and pipeline	v0.1.0	51 of 51 tests	xxxxxxx
VVUQ-02	ten-gate humanoid codebase	v1.0.0	172 of 172 tests	xxxxxxx

Table 1: Table 1. Source works behind this comparative print, at a glance.

SEC. 4. ANALYSIS.

This section analyzes the comparative print. Keep the prose to one short paragraph and let a later revision expand each clause into its own section file.

SEC. 5. CONCLUSION.

This section concludes the treatment of the comparative print and points to the back matter for acknowledgments, rights, citation, and data availability.

AUTHORSHIP, NOTICES, AND BACK MATTER

Acknowledgments

The author acknowledges Anthropic for access to Claude Code for the preparation of this comparative print; and OpenAI ChatGPT, Claude Haiku, and Google Gemini for research assistance.

Ethical Disclosures

The author declares no competing interests. This is an independent draft and is not endorsed, sponsored, or approved by any trial sponsor, CRO, site, IRB, regulator, or medical society, nor by CFR, ICH, or FDA. All supporting numbers are simulation or illustrative results.

Rights and Permissions

This comparative print is distributed under the Creative Commons Attribution 4.0 International License (CC BY 4.0), which permits unrestricted use, distribution, and reproduction in any medium provided the original author and source are credited. To view a copy of this license, visit <https://creativecommons.org/licenses/by/4.0/>. Reproduced public-domain text is used under 17 U.S.C. § 105.

Kawchak K. Ramseyer Comparative Print for H. R. 9510. Zenodo. 2026; 10.5281/zenodo.xxxxxxxx.

Data Availability

All scaffolding, instructions, and supporting records are openly available in the [kevinkawchak/cancer-automated](#) and [kevinkawchak/physical-ai-oncology-trials](#) GitHub repositories and are archived on Zenodo. All data sets are synthetic or illustrative and reproducible from a deterministic seed; no patient-identifiable information is included.
