Abstract.

A response-plan template for adverse and serious adverse events in a Physical AI oncology trial, with roles, timing, and reporting.

Disclaimer: This work is independent and not endorsed or sponsored by trial sponsors, FDA, CROs, sites, IRBs, regulators, or medical societies; and was generated using Artificial Intelligence.

Keywords

1 Introduction

This section introduces the clinical trial and states the scope of this paper. Replace this short paragraph with the opening context; one short paragraph per section keeps the template minimal and easy to extend.

2 Methods

This section gives the background for the clinical trial. The single image placeholder below is based on the figure code of VVUQ-02 and renders a framed box until a real PNG is dropped into the Images folder.

*Image placeholder for Images/trial-workflow.png. Replace with
`\includegraphics[width=1.1\linewidth]{...}`.*

Figure 1: Figure 1. Placeholder schematic for the trial workflow.

3 Cohort and Endpoints

This section records the clinical trial at a glance. The one table below is modeled on Table 1 of the VVUQ-05 final bill; keep cells short and ragged right so the table matches the body measure.

Work	What it is	Releases	Headline result	End-goal DOI
VVUQ-01	method and pipeline	v0.1.0	51 of 51 tests	xxxxxxx
VVUQ-02	ten-gate humanoid codebase	v1.0.0	172 of 172 tests	xxxxxxx

Table 1: Table 1. Trial record behind this template, at a glance.

4 Results

This section analyzes the clinical trial. Keep the prose to one short paragraph and let a later revision expand each clause into its own section file.

5 Discussion

This section concludes the treatment of the clinical trial and points to the back matter for acknowledgments, rights, citation, and data availability.

Acknowledgments

The author acknowledges Anthropic for access to Claude Code for the preparation of this paper; and OpenAI ChatGPT, Claude Haiku, and Google Gemini for research assistance.

Ethical Disclosures

The author declares no competing interests. This is an independent draft and is not endorsed, sponsored, or approved by any trial sponsor, CRO, site, IRB, regulator, or medical society, nor by CFR, ICH, or FDA. All supporting numbers are simulation or illustrative results.
