

**Bill:** H. R. 9510 (illustrative; the Clerk assigns the number at introduction), 119th Congress, 2d Session. **Refer to:** House Energy and Commerce (Health)

---

## Stakeholder Engagement Plan

Prepared by Kevin Kawchak , CEO ChemicalQDevice | kevink@chemicalqdevice.com | 10.5281/zenodo.xxxxxxxx

*Independent research draft. Not an enacted law and not legal advice; not endorsed by the FDA, HHS, or any Member of Congress.*

### Subject

### Objective and principles

---

This plan organizes respectful, factual outreach to the parties the bill serves. Each contact carries the same message: the patient, not the vendor or the payer, is the party the verification gate protects. No agency or Member is presented as endorsing the measure.

### Stakeholder register

---

| Stakeholder            | Interest                     | Section that answers it   |
|------------------------|------------------------------|---------------------------|
| Health systems         | throughput, safety, cost     | implementation and fiscal |
| Clinicians             | retained human oversight     | attestations              |
| Patients and advocates | nondiscrimination and access | nondiscrimination clause  |
| Device makers          | a clear automatable rule     | section 515D gate         |

**Table 1:** Table 1. Stakeholder register (modeled on VVUQ-05 Table 1).

### Engagement phases

---

Outreach proceeds in three deliberate phases.

1. **Listen.** brief agencies and standards bodies and invite technical correction
2. **Align.** reconcile the gate criteria with advocacy and industry input
3. **Sign on.** circulate the frozen text for cosponsor sign-on

*Figure placeholder (Images/engagement-timeline.png). The float, caption, and \label mirror the VVUQ-02 figures; replace the box with \includegraphics.*

**Figure 1:** Figure 1. Placeholder timeline of the three engagement phases.

## Messaging guardrails

---

Outreach is non-partisan and evidence-first: claims are limited to what the record supports, all numbers are labeled as simulation or illustrative, and no patient-identifiable information is used.
